PATENT

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

Appln. No: 10/796,450
Applicant: David G. Wilson
Filed: March 9, 2004
Title: A SOFT TISSUE CEPHALOMETRIC SCREEN WITH SUBMENTAL-NECK
EXTENSION, AND RADIOLOGY APPARATUS, MODULAR SYSTEM AND
IMAGINING METHOD USING SAME
TC/A.U.: 2882
Examiner: Not Yet Known

INFORMATION DISCLOSURE STATEMENT

Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Sir:

Pursuant to 37 C.F.R. §§ 1.97 and 1.98 and to the duty of disclosure set forth in 37 C.F.R. § 1.56, the Examiner in charge of the above-identified application is requested to consider and make of record the references listed on the PTO 1449 (RP) and form 1449B/PTO submitted herewith.

Although the information submitted herewith may be "material" to the Examiner's consideration of the subject application, this submission is not intended to constitute an admission that such information is "prior art" as to the claimed invention.

In accordance with 37 C.F.R. § 1.97(g), the filing of this Information Disclosure Statement shall not be construed to mean that a search has been made.

The non-patent literature cited herein is addressed according to the applicant's unique citation designation number and the statements below are made to the best applicant's knowledge.

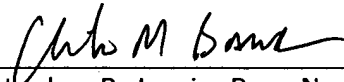

Cite No. 1 and attached Figure 1 illustrate the applicant's prior invention of a "built in" soft tissue filter screen. This prior soft tissue filter screen is identified by its "L" shaped configuration, immovably mounted in and peripherally confined by the collimator of a Wehmer-manufactured cephalometric radiology device as shown in the attached Figure 1. Approximately in 1984, the applicant first used this soft tissue filter screen in a cephalometric radiology device of applicant's dentistry practice.

Cite No. 2 and attached Figure 2 illustrate a Wehmer soft tissue filter shield. This shield is wedge-shaped and has anatomical contours similar to a human face. The shield hangs on the top edge of the X-ray film cassette and has a vertical adjustment knob as shown in Figure 2. This shield has been publicly available since 1976.

Cite No. 3 and Figure 3 illustrate a TP Laboratories soft tissue face shield. This face shield is slightly contoured similar to the profile of a human face and neck. As shown in Figure 3, the person undergoing exposure holds the face shield against his or her face. This shield was on sale as of 1979.

This Information Disclosure Statement is being filed within three months of the filing date of the above-referenced application or before mailing of the first Official Action. No first Official Action has yet been received and it is presumed that none has yet been mailed. No fee or statement is required. 37 C.F.R. § 1.97(b).

Respectfully submitted,

Christopher R. Lewis, Reg. No. 36,201
Christian M. Bauer, Reg. No. 51,443
